

WE'RE HIRING!

 **SVI**
Your Global Solutions Partner

IOS DEVELOPER

We are looking to hire a talented iOS developer to design, build, and maintain the next generation of iOS applications. Your primary focus will be developing high-end iOS applications for the latest Apple mobile devices. Your duties may include collaborating with the design team for new application features, identifying and fixing application bottlenecks, maintaining the core code, and updating applications published on the App Store. You may be also assigned to provide technical guidance and leadership to software to development team.

Responsibilities

- Designing and building mobile applications for Apple's iOS platform.
- Collaborating with the design team to define application features.
- Ensuring quality and performance of the application based on requirement specifications.
- Identifying potential problems and resolving application bottlenecks.
- Unit-testing code for robustness, including edge cases, usability and general reliability.
- Fixing application bugs before the final release.
- Publishing application on App Store.
- Maintaining the code of the application.
- Designing and implementing application updates.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

Requirements

- Bachelor's Degree in Computer Science, Computer Engineering, Information Technology or relevant field.
- With at least 3 years proven experience as an application developer.
- Proven working experience in iOS application development and have published one original iOS app in the App Store.
- Experience in providing technical guidance and mentoring to more junior developers is an advantage.
- Proficient in Swift.
- Extensive experience with iOS Frameworks such as Core Data and Core Animation.
- Knowledge of iOS back-end services.
- Knowledge of Apple's design principles and application interface guidelines.
- Proficient in code versioning using Gitlab.
- Familiarity with push notifications, third-party libraries, APIs, and cloud messaging.
- Solid understanding of the full mobile development life cycle.
- Candidate must be willing to work in Ortigas Center, Pasig City.
